DETAILED ACTION

Allowable Subject Matter

1. The following is a statement of reasons for the indication of allowable subject matter: Claim 1 is allowable over the art of record because the prior art does not teach wherein the subsequent antenna element is at least one subsequent antenna loop element positioned in a spaced relationship with the primary antenna loop element, wherein the at least one subsequent antenna loop element is vertically spaced from and substantially in alignment with the primary antenna loop element, and in combination with the remaining claimed limitations.
2. Claim 9 is allowable over the art of record because the prior art does not teach wherein the subsequent antenna element is an inner antenna element extending within an inner area of the primary antenna loop element and in operable communication with the primary antenna loop element, and in combination with the remaining claimed limitations.
3. Claim 21 is allowable over the art of record because the prior art does not teach wherein the subsequent antenna element is a plurality of inner antenna elements extending within an inner area of at least one of the primary antenna loop element and at least one subsequent antenna loop element, each of the inner antenna elements in operable communication with the respective primary antenna loop element and at least one subsequent antenna loop element, and in combination with the remaining claimed limitations.

Art Unit: 2821

4. Claim 38 is allowable over the art of record because the prior art does not teach wherein the directional flow of current through the at least one subsequent antenna loop element and the primary antenna loop element are identical, thereby yielding a cumulative field effect, and in combination with the remaining claimed limitations.
